| <b>2D Design Tools</b><br>Create basic elements such as lines, polylines, arcs, circles, ellipses, layers, blocks, and others.                         | ✓                   | ✓                       | ✓                  | ✓                     |
| <b>2D Documentation Tools</b><br>Create basic annotation elements such as notes, dimensions, tables, hatches, clouds, and others.                      | ✓                   | ✓                       | ✓                  | ✓                     |
| <b>Community Resources</b><br>Offer learning resources and a collaborative environment to interact with your peers, ask questions, and share opinions. | ✓                   | ✓                       | ✓                  | ✓                     |
| <b>PDF Underlay</b><br>Attach pages of a PDF document to a drawing.  | ✓                   | ✓                       | ✓                  | ✓                     |
| <b>Toolbox</b><br>Quickly generate hardware, holes, balloons, Bills of Materials (BOMs), welding and surface finish symbols.                           | X                   | ✓                       | ✓                  | ✓                     |
| <b>Batch Printing</b><br>Send a set of drawings and sheets to printers in a batch job.   | X                   | ✓                       | ✓                  | ✓                     |
| <b>Drawing Compare</b><br>Compare graphically similar entities between two drawing documents.  | X                   | ✓                       | ✓                  | ✓                     |
| <b>Power Trim</b><br>Trim multiple, adjacent entities by dragging the pointer across each entity.  | X                   | ✓                       | ✓                  | ✓                     |
| <b>G-Code Generator</b><br>Communicate with a CNC machine for fabrication.   | X                   | ✓                       | ✓                  | ✓                     |
| <b>DGN Import</b><br>Directly import and convert the DGN file format drawing into a DraftSight project for direct editing.                             | X                   | ✓                       | ✓                  | ✓                     |
| <b>DraftSight APIs</b><br>Allow end users or third-party developers to customize and automate DraftSight.  | X                   | ✓                       | ✓                  | ✓                     |
